Dr. Michael N. Geselowitz, Ph.D.
Senior Director, IEEE History Center
Rutgers University (College Avenue Campus)
39 Union Street
New Brunswick, NJ 08901-8538, USA

Dear Dr. Geselowitz,

On behalf of, and in quality of the Chair of IEEE Kansai Section,
I strongly support the Milestone proposal of Sharp 14-inch
thin-film-transistor liquid-crystal display (TFT-LCD).

The 14-inch TFT-LCD has proved that a TFT-LCD can replace
CRTs in TVs with higher picture quality, which has opened the
door for the successful growth of LCD industries.

We are proud that this memorable development has been completed
in Kansai area. I believe that the 14-inch LCD is highly
qualified as IEEE Milestone.

Sincerely Yours,

Hidetoshi Onodera,
Chair, IEEE Kansai Section.
